Please join the George Washington University Regulatory Studies Center for a presentation by
Dr. Ragnar E. Löfstedt, Professor of Risk Management and Director of King’s Centre of Risk Management, King’s College London, UK

Evidence based uncertainty analysis: What should we now do in Europe?

**When:** Friday April 22, 2016
10:30am-12pm
Light refreshments will be provided

**Where:** 805 21st Street, NW, Washington, DC
MPA Room 309

**Summary:**
Professor Löfstedt will summarize the European Food Safety Authority’s (EFSA) new guidance on uncertainty analysis that “must be embedded into scientific assessment in all areas of EFSA’s work.” EFSA believes that greater transparency regarding the uncertainty of some of their scientific opinions will “enable citizens to contribute more widely to its risk assessment work and thereby to increase trust.” Dr. Löfstedt’s presentation will provide recommendations for EFSA and other European agencies considering similar uncertainty guidance documents on how to help ensure that those efforts remain as evidence-based and risk-informed as possible.
